CS 470 Final Reflection

<https://www.youtube.com/watch?v=T07HlwXy9rM>

Through full stack development 2 I gained more knowledge and experience with application development. We progressed through development of a cloud-based app, with the help and use of the Amazon Web Service. The skills learned from doing this work help to build a more well-rounded foundation for myself. As far as strengths as a developer, I am not one to hide the reality that this is a fairly new skill for me, and I may not have developed particular strengths yet. However, I am increasingly impressed with my ability to take on challenges and prevail in this coursework. General strengths include my analytical mindset, ability to take and receive feedback, and not being afraid to ask questions.
